WHAT CAN YOU TRADE IN FUTURES?

Five major categories — each with different behaviour, hours, and characteristics

► EQUITY INDEX FUTURES

NQ · ES · YM · RTY | Micros: MNQ · MES · MYM · M2K

Trade overall US stock market movement. Micros are 1/10th the size — ideal for smaller accounts & beginners learning the market.

► COMMODITY FUTURES

CL (Crude Oil) · GC (Gold) · SI (Silver) · NG (Natural Gas)

Trade raw materials. Heavily driven by geopolitical events, supply/demand data, and global macro news cycles.

► CURRENCY / FOREX FUTURES

6E (Euro) · 6B (GBP) · 6J (Yen) · 6A (AUD)

Trade major pairs via CME — regulated, centralized, no broker requoting or slippage manipulation. Cleaner fills than spot forex.

► INTEREST RATE / BOND FUTURES

ZB (30yr Bond) · ZN (10yr Note) · ZF (5yr Note)

Driven by Fed policy and inflation data. Strongly correlated with equity indices on risk-off macro days.

► CRYPTO FUTURES (CME)

BTC · ETH · MBT (Micro Bitcoin) · MET (Micro Ether)

Regulated crypto exposure via CME. Cash settled — same volatility, zero custody or wallet risk.

Tick = smallest possible price movement · Tick Value = \$ gained or lost per tick · Use "1!" suffix on TradingView for the continuous front-month chart

WHAT IS CONTRACT ROLLOVER?

Futures contracts have an expiration date. When that date approaches, traders "roll over" — closing the expiring contract and reopening in the next one. **Volume is your signal**, not the calendar date.

NQ / ES / YM / RTY — 4 CONTRACTS PER YEAR (QUARTERLY ONLY)

MAR NQH26 Expired Closed	JUN NQM26 Jun 20, 2026 LIVE NOW	SEP NQU26 Sep 18, 2026 Next	DEC NQZ26 Dec 18, 2026 Far
--	---	---	--

- 01

Only 4 contracts exist per year
March (H), June (M), September (U), December (Z). Each expires on the 3rd Friday of its month. At any time, only 2 are actively traded — the front-month and the next quarter.
- 02

Roll date = Monday before 3rd Friday
Per CME, the official roll date is the Monday prior to the 3rd Friday of expiry. After that, the next quarter becomes the "lead month" and has more volume.
- 03

Watch volume — not the date
Rollover is confirmed when volume shifts to the next contract. Monitor CME open interest or simply check which contract has more volume on your broker.

CONTRACT MONTH LETTER CODES

F	G	H	J	K	M	N	Q	U	V	X	Z
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

H · M · U · Z highlighted = the 4 NQ/ES/YM/RTY quarterly expiry months

PRO TIP Always use **NQ1!**, **ES1!**, **YM1!** on TradingView. The "1!" suffix auto-loads the front-month contract — no manual switching needed at every rollover.

CURRENT ACTIVE CONTRACTS — APRIL 2026

● March contracts expired mid-March · We are in the **JUNE 2026** cycle
